Please check SI-card numbers in the start list and make sure that competitors will start with appropriate SI-card!

RELAY

- Courses are using a relatively small area, therefore controls are situated close to each other and courses cross themselves. No controls closer to each other than 60 metres, though. Check carefully control codes and control sequence!
- Big difference in 1st and 2nd loop lengths - over 1km
- Lakes are out of bounds, also mapped like this (dark blue with black borderline)
- **There are some unmapped scooter tracks, which are closed with plastic tape!**
These tracks are of poor quality and do not offer any good route choices

The dotted tracks were accurate today (represented the skiing speed), but we don't know if the dotted tracks will be skiable tomorrow. All lined tracks will be convenient for skiing.

GPS tracking

GPS tracking devices will be handed out on the arena. Selected skiers are marked in the start list .

GPS tracking without background map will be shown on a screen inside the Café building during the event. **Note that it is still not allowed or fair play to watch tracking on the Internet during the competition!**
